

# Did You Increase Your Core Gold Holdings?

Dear Subscriber,

I sure hope you bought or added to your core gold holdings when I alerted you to do so last Tuesday, September 16.

If you did, you should have already seen gains of as much as 14.5% in gold -- in just over one week -- while my recommended gold mining shares (*specific recommendations were reserved for active Real Wealth Report subscribers*) -- have rocketed higher by as much as 20.8%, also in just over one week!

But if you didn't act on the recommendations I was able to give you in that flash alert, not to worry. I believe that gold is heading much higher. The financial crisis the U.S. is experiencing is not over, it's the worst crisis we've ever experienced, and it virtually guarantees much higher gold prices.

Consider the following two possible scenarios ...

A. Congress passes the \$700 billion bailout package. The dollar gets whacked, anticipating massive money creation, and more inflation. What's that do to gold? Answer: It drives it higher.

B. Congress doesn't pass the bailout package, or, passes it with certain conditions attached. There's no soothing over the markets under this scenario. The crisis deepens.

What's that do to gold? Answer: Drives it higher.

So other than a short-term pullback here and there, gold is a win-win investment if I ever saw one.

Hence, I repeat my view right now:

**If you haven't already done so, make sure you move immediately to a 25% core gold holding in your investment portfolio.**
